## The Lean Enterprise Workshop

Lean Concepts originated in the Toyota Production System, a system of waste elimination that focuses on Customer needs instead of internal structures.

The Lean Enterprise Workshop challenges the traditional manufacturing and service delivery methods that were built for internal “efficiency”. Instead, it demonstrates a customer focus that dramatically changes our ability to provide quality products and services much better than we thought possible.

### The Lean Enterprise Workshop Demonstrates

- Improved agility / customer responsiveness
- Reduced capital employed
- Waste reduction
- Reduced Time to Market
- Dramatic inventory reductions
- Reduced space requirements
- Reduced impact of Design Changes
- Reduced impact of problems when they do occur
- Increased output
- Increased productivity through workplace design
- Improved communication

### You will be introduced to:

- The Lean Customer focus
- The 10 Wastes that impede corporate success
- Single Piece Flow, the fastest quantity of any product or service to provide.
- Cellular concepts that improve communication, reduce wasted time, and reduce cycle time
- Set-up Reduction (SMED), the enabling tool for single piece flow
- Kanbans, visual signals for controlling production flow
- 5S, the workplace organization tool that enables safer, more productive work
- “Pull” Processing
- Value Stream Mapping, the tool that highlights improvement opportunities
- Takt Time, the tool for pacing your operating pace

### Who should attend:

- **CEO's, Presidents, and COO's** – anybody who is responsible for facilitating total enterprise success and profitability.
- **Directors and Managers** who need to work collaboratively to increase agility, reduce cost, and improve service levels.
- **Supervisors** who need a better understanding of how they fit into the total picture and why some activities we have always assumed to be right are actually causing problems.
- **Engineering and Business Process** personnel who need to develop products and services that provide value to their customers.
- **Production and Service Delivery** personnel, who are on the front lines of any organization and need to be at the forefront of improved safety, productivity, and empowerment.
